

ENGINEER'S HAMMER - CARBON HANDLE Réf.: 0001260701

Caracteristics

French pattern. Initially used by mechanics, who seek both power and precision. C45E high carbon steel head. Forged head, with heat treatment by induction of working surfaces (54 HRC). Finely polished working parts. Epoxy powder painting by electrostatic process, followed by baking. 1/20th chamfer of the head at 45°. The nozzle is made by a hydraulic machine, a stress sensor measures on each product the power of the nozzle, then a pressure sensor controls the installation of the resin. The pull-out performance is much higher than the standards and is the trademark of MOB outillage. Composite handle Carbon quadri-material, with an unbreakable fiberglass core and 2 carbon fiber bars, anti-vibration polypropylene and elastomer surinjection for grip. A dry and precise hit. Probably the best hammer in the world. Made in our factories in France.

Carbon
