

BATIPRO CLAW HAMMER, NOVAMAX 37 CM HANDLE Réf.: 100016

Characteristics

PREVENTION OF RISKS

Prevention of risk of accident :

- Rounded claws and striking surfaces edges : Prevention of risk of cuts.
- Novamax® three material high resistance handle, with steel mis-hit guard, protects against risk of injury caused by head of the tool hitting the user or people in the vicinity if the handle breaks.
- Flush socket sleeve fitting, protects the end of the handle from breaking due to mis-hits.

ADVANTAGES OF THE PRODUCT

Strength :

- Forged and tempered carbon steel

Ergonomics :

- Novamax® ergonomic handle

Product highlights :

- Magnetic nail-holder, for one-handed hammering without holding the nail
- Lateral striking surfaces for working in confined spaces

SAFETY RECOMMENDATIONS

- Wear goggles, gloves and protective clothing
- The main risk for these tools is projection of metal splinters from the tool or from the object which is struck.
- The metal splinter may be due to a defect in metal, simple wear and tear or incorrect use.
- It is strictly forbidden to hit two striking surfaces together, the risk of splintering is real and serious.
